

## Jobs you can do - the Garden

Here are some of the tools that were used in the film:

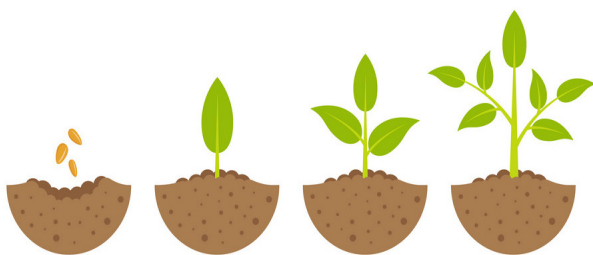

### Task 1 - Know your tools

In the spaces below write down or draw 3 of these tools and explain how you would use them:

My tools	How I use them

### Task 2 - Grow a plant

With your teacher pick some flowers or plants in the school garden or somewhere nearby.

Put the plants on a tray on a window ledge until they are dry. This might take a week.

Once the plants are dry take off the top part which has all the seeds.

Plant this in some soil in a pot.

Put the pot on the tray on the window ledge.

Check your plant every day and water it if it is getting dry.

Enjoy watching it grow.
